PIE CHART

A bar chart typically consists of bars of different lengths or heights that represent data values, and it is usually used to compare or display categorical or numerical data.

A treemap is a data visualization technique that uses nested rectangles to represent hierarchical data. Each rectangle's size represents a specific attribute or value, allowing for easy comparison and exploration of the data's structure.

A pie chart is a circular graphical representation that divides data into slices, where each slice represents a proportion or percentage of the wh..
